

Panarchy chart

Stochastic Parrots and Beyond · adapted from Liberating Structures

Print the chart on page 2 for each participant, and once in A1 or A0 for the wall. Name the levels with your group. Use sticky notes for influences, opportunities, and barriers. See the [Panarchy page](#).

How to use the chart

1. Write the challenge at the top.
2. List the factors that shape the challenge, one per note.
3. Sort the notes into levels, from small and fast at the bottom to large and slow at the top. Name each level.
4. Mark levels that get little attention, and places where resources are missing.
5. Add opportunities and barriers between the levels that they connect.
6. Vote for three priorities. Note an owner and a review date for each.

The levels are yours to discover. One possible set, as an illustration only: individual research project, research group or department, university and research sector, model vendors and industry, regulation and society.
